

Nomo becomes Certified Bosch Rexroth Excellence Partner in Finland.

Nomo has signed an agreement to become a Certified Bosch Rexroth Excellence Partner in Finland, effective 23 February 2026. Together with our specialist business unit Nomo Automation, we strengthen our offering of components, functionality and complete systems within industrial automation and linear solutions for the Finnish market.

Nomo combines strong engineering capabilities with high-quality products to deliver reliable, efficient and future-proof solutions.

“Becoming a Bosch Rexroth Excellence Partner in Finland is an important strategic milestone for Nomo”

“By combining Bosch Rexroth’s leading technologies with our engineering competence, especially within industrial automation and linear solutions, and our local presence, we can offer Finnish customers even stronger support – from single components to complete, customised systems”, says John Westerling, Sales Director at Nomo.

Key strengths of Nomo include:

- Deep technical expertise in industrial automation, motion control and linear solutions
- Strong application know-how from a wide range of Finnish industries
- Ability to design, build and deliver customised, turnkey solutions
- Close collaboration between engineering, production and logistics for fast, secure deliveries

During 2025, Nomo acquired the Bosch Rexroth Customizing Center in Sweden. Through this centre and our production units in Sweden, we develop, design, machine and assemble customer-specific solutions.

With an experienced team offering deep technical and product-related competence, supported by fast deliveries from local warehouses, Nomo is now even better positioned to support Finnish customers with advanced Bosch Rexroth-based automation and linear solutions.

About Nomo Group.

Nomo Group is a leading Nordic specialist in components and solutions for mechanical power transmission – bearings, seals, transmissions, industrial services, and advanced automation and linear technology. The company operates within the business area Power Transmission Solutions at Axel Johnson International.

About Axel Johnson International.

Axel Johnson International is a privately owned Swedish industrial group operating globally. The group has a dedicated long-term approach to ownership, emphasizing sustainable progress and collaboration. The focus lies on acquisitions and the development of companies, specializing in technical components and industrial solutions. The group consists of more than 200 companies and employs 6,000 people in 35 countries, organized into six business groups, each focusing on selected niche markets. Axel Johnson International is a part of the Swedish family-owned corporate group, Axel Johnson.
